DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a syringe pump, classified in class 128, subclass Dig 1.
 - II. Claims 11-14, drawn to a method of detecting obstruction, classified in class 604, subclass 505.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of detecting as claimed can be practiced with another materially different product such as an occlusion catheter for use to detect obstruction in the blood vessel.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3763

5. A telephone call was made to Mr. Louis Woo on 03/08/04 to request an oral election to the above restriction requirement, but did not result in an election being made immediately.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anhtuan T. Nguyen whose telephone number is 703-308-2154. The examiner can normally be reached on Mon-Fri, 0830-1800 hours.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Leslie et al (4,529,401).

Leslie et al disclose a syringe pump system in Figure 1 comprising a plunger head actuator, an electric motor, a drive mechanism, and a shaft (54). Leslie et al further disclose in Figures 3a & 3b an optical encoder (84) and a photo transistor (88), as the shaft (54) rotates and exposes the openings of the encoder disc (82) to produces pulses (col. 5, lines 5-17, lines 24-28, lines 38-40; col. 14, lines 26-44).

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Langner et al (4,812,724) or by Sanderson et al (5,176,666).

Langner et al disclose a syringe pump system comprising a plunger head actuator (12); a shaft (6); an electric motor (M – Figure 1); a microprocessor (1); an encoder (14); and a pulse width modulator (19) (see Abstract and Figures 1-3).

Similarly, Sanderson et al disclose an invention as claimed (see col. 8, lines 8-21; col. 9 lines 19-22; col. 10, 3rd paragraph; and claim 4). Sanderson et al also disclose the monitoring to the changes in pulses resulted from a rotary indicator receiving signals from the monitoring

circuit (col. 3, lines 5-18); and how the circuit is used to monitor changes in the speed of the motor (col. 3, lines 34-53).

Election/Restrictions

4. During a later telephone conversation with Mr. Louis Woo on 03/08/04 a provisional election was made without traverse to prosecute the invention of Group 1, claim 1-10.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-14 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.
